Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 February 2006.
2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nielsen in view of Utsumi et al.

Nielsen (US Patent Number 3,965,601) discloses:

- Regarding claims 1 and 6, a plurality of corner brackets (Figure 3, element 30); and a plurality of extrusions (Figure 2, element 16 and 14), wherein each extrusion has a first slot (Figure 2, element 14) within which the corner brackets (element 30) are positioned and a second slot (Figure 2, element 16).
- Regarding claims 2 and 7, the extrusions (Figure 2, element 16 and 14) are formed of a material selected from the group consisting of metal (column 2, lines 6-9).
- Regarding claims 3 and 8, the corner brackets (Figure 3, element 30) are formed of a material selected from the group consisting of metal (column 2, lines 6-9).

- Regarding claims 4 and 9, each corner bracket includes at least one notch for securing the bracket to the extrusion (column 4, lines 43-45 and 47-51).
- Regarding claims 5 and 10, each corner bracket includes at least one stop (Figure 5, element 42).

Nielsen teaches the salient features of the present invention as explained above, except (regarding claims 1 and 6) a screen, wherein the screen frame and screen protrude in front of a display cabinet of the projection display.

Utsumi et al. (US Pub. No. 2002/0181098 A1) disclose a screen (Figure 1, element 2023), wherein the screen frame (Figure 1, element 2020) and screen (Figure 1, element 2023) protrude in front of a display cabinet of the projection display (Figure 1, element 2000).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the screen and screen frame for a projection display disclosed by Utsumi et al. in combination with Nielsen's invention, for the purpose of positioning the screen in the housing of the projector (Utsumi et al., page 1, paragraph 0021, lines 6-8).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Nardulli (US Patent Number 2,816,632) discloses a metal frame in which the frame elements are secured together by corner brackets.
